CLAIMS

1. An ink cartridge that can be attached to/detached from an ink jet printer, wherein a holding portion formed over two faces of the cartridge adjacent to each other is provided.

5

- 2. The ink cartridge according to claim 1, wherein the holding portion has a structure held from a vertical direction.
- The ink cartridge according to claim 1, wherein the two faces of the cartridge adjacent to each other are an upper face and a front face of the cartridge.
 - 4. The ink cartridge according to claim 1, wherein one end of the holding portion is a projection portion provided on an upper face of the cartridge.
 - 5. The ink cartridge according to claim 4, wherein the projection portion is provided at a front end portion of the upper face of the cartridge.

20

15

- 6. The ink cartridge according to claim 1, wherein one end of the holding portion is a corner portion of a recess portion provided on a front face of the cartridge.
- 25

7. '

The ink cartridge according to claim 6, wherein the corner

portion of the recess portion is formed to have an acute angle.

- 8. The ink cartridge according to claim 6, wherein the corner portion of the recess portion is positioned in a midway, in a vertical direction, of the front face of the cartridge.
- 9. The ink cartridge according to claim 6, wherein the recess portion is formed over an entire width of the cartridge and is opened at both end portions.

10

5

- 10. The ink cartridge according to claim 6, wherein an angle formed by a lower end portion of the recess portion and the front face of the cartridge is an obtuse angle.
- 15 11. The ink cartridge according to claim 1, wherein the holding portion has a flat portion that allows pressing in a cartridge mounting direction.
- 12. The ink cartridge according to claim 1, wherein a holding style of the holding portion can be changed according to a height at a time of cartridge mounting.
 - 13. The ink cartridge according to claim 1, wherein a guide member is provided that guides the cartridge during cartridge mounting.

- 14. The ink cartridge according to claim 13, wherein positioning of the cartridge during cartridge mounting is performed by the guide member.
- 5 15. The ink cartridge according to claim 14, wherein the guide member has a positioning portion that performs positioning in a vertical direction.
- 16. The ink cartridge according to claim 14, wherein the guide member has a positioning portion that performs positioning in a front and rear direction.
 - 17. The ink cartridge according to claim 13, wherein the guide member is provided at a different position corresponding to the color of ink to be accommodated.
 - 18. The ink cartridge according to claim 1, wherein an ink supplying tube is provided at a rear face portion of the cartridge, a space is provided around the ink supplying tube, and the space is opened to the outside at both sides, in a widthwise direction, of the cartridge.
 - 19. An ink cartridge that is attachable to/detachable from an ink jet printer, wherein a recess portion is provided at a front face of the cartridge.

15

20

- 20. The ink cartridge according to claim 19, wherein one corner portion at the recess portion is a finger putting portion on which a finger of the user is put during cartridge attaching/detaching.
- 5 21. The ink cartridge according to claim 20, wherein the finger putting potion is formed to have an acute angle.
 - 22. The ink cartridge according to claim 19 wherein the recess portion is positioned in a midway, in a vertical direction, of the front face of the cartridge.
 - 23. The ink cartridge according to claim 19, wherein the recess portion is formed over an entire width of the cartridge and is opened at both end portions.

15

10

- 24. The ink cartridge according to claim 19, wherein an angle formed by a lower end portion of the recess portion and the front face of the cartridge is an obtuse angle.
- 20 25. An ink jet printer including an attachable/detachable ink cartridge that has a holding portion formed over two faces of the cartridge adjacent to each other.
- 26. An ink jet printer including an attachable/detachable inkcartridge provided with a recess portion at a front face of the cartridge.
